1.8. Modules of the academic discipline programme.

Module 1. General provisions of European private international law.

Module 2. Legal relations in European private international law.

The program of an educational discipline is a set of modules, their certain sequence, which contributes to the mastery of certain competencies necessary to achieve specific learning outcomes. Each module has a certain logical completeness in relation to the necessary results of mastering the educational and professional program as a whole. Topics are not defined within the module.

The modular principle of building the curriculum of an educational discipline ensures the flexibility of the content of the educational discipline, which is reflected in the possibility of its differentiation and integration. Continuity of a meaningful and logical transition between the modules of the educational discipline program, as well as the increase of new knowledge become possible thanks to the application of the "didactic spiral" principle.

The number of educational units (didactic volume) of the content of the educational discipline must correspond to the structure of the educational discipline and the actual study time of the students.

The didactic scope of the educational discipline is determined by the developer in an expert manner with a focus on the subject area of the educational discipline, as well as on competence and learning outcomes.

Quantitative and qualitative indicators of the implementation of the educational discipline program within the didactic structure are defined in the taxonomy of the educational discipline.

The explanation of the modules of the competence-oriented program of the educational discipline is defined in the matrix of connections between the modules of the educational discipline, learning outcomes and subject competencies (Appendix 3).

4. Resource support of the academic discipline

4.1. Forms of the educational process and types of educational activities.

- forms of the educational process: educational training; individual work; practical training; control measures.

- types of educational activities: lectures, seminars, individual work, tutorials.

4.2. Independent work of students of higher education

Independent work is a type of out-of-class work of an educational nature, which is aimed at studying the program material of the educational course. The content of independent work is determined by the program of the study discipline "European private international law", methodical materials, tasks and instructions of the teacher. During independent work, the applicant must process lecture notes, materials presented in textbooks, training manuals on legal regulation of the EU internal market, EU law, sources of international and national law of Ukraine and foreign countries, international and national judicial practice in accordance with the topics of the academic discipline. It is also important to work with scientific and practical comments, monographs, scientific articles, other scientific and educational literature recommended by the teacher. Methodical materials should provide for the possibility of self-monitoring by the student.

The student's independent work on learning the educational material can be carried out in the University's scientific library, classrooms, computer classes (laboratories), as well as at home.

In necessary cases, this work is carried out in accordance with a schedule prepared in advance, which guarantees the possibility of individual access of the student to the necessary didactic tools.

The forms of independent work of students are:

- written homework;
- assimilation of theoretical material on the topics of practical classes;
- revision of lecture materials;
- work in information networks;
- development of additional literature;

- development of cases;
- essay on highly specialized issues;
- creation of a training course portfolio and its presentation;
- writing abstracts, reports and their presentation;
- preparation and publication of scientific articles, theses of scientific reports;
- participation in student scientific and practical conferences;
- compiling a bibliography on the relevant topic;
- generalization of court practice;
- commenting on sources of international law, as well as national law of Ukraine and foreign countries;
- other forms of work.

The student chooses the types of independent work according to his own interests and is agreed with the teacher, who ensures organization, control and evaluation of the quality of the corresponding work.

Educational material, which, according to the working curriculum, must be mastered by students in the process of independent work, is included in the sum of the points of the current control together with the educational material that was processed during the training sessions.

4.3. Educational technologies and teaching methods

– educational technologies: problem-based learning, contextual learning, student-centered learning, audio-visual technologies, scientific discussions, interactive technologies, IT technologies, etc.;

– teaching methods: combination of verbal, visual and practical methods, method of problem-based teaching, press conferences, business games, brainstorming, simulation of professional situations, case method, discussion method, round table, etc.

4.4. Forms of pedagogical control and the system of evaluating the quality of formed competences based on the results of mastering an educational discipline

Forms of students' knowledge control are current and final control.

Current control of students' knowledge includes:

- quality control of students' assimilation of the program material of the educational discipline in practical classes using the following means: oral, written or express survey, performance of test tasks, solving practical tasks or tasks, participation in case development, defense of the EU Court of Justice portfolio, preparation and defense of essays or an essay on the initiative of the student, etc. Current control is aimed at checking the level of student preparation for studying the current material. In the course of a practical session, a student can receive a grade on a five-point scale (1, 2, 3, 4, 5);

- quality control of the students' assimilation of the program material of the educational discipline, which is carried out at the end of the modules (colloquiums, control papers, test tasks, etc.).

Based on the results of practical classes from each of the two modules, the number of points is calculated, which is included in the final assessment of knowledge.

During the semester, students perform tasks for **independent work** (processing of statistical data of EU institutions, decisions of the Court of the European Union; preparation of abstracts of reports for scientific and practical conferences and articles; conducting a research (project) on a narrow issue with its subsequent presentation, etc.). The work is individual and independent, and therefore co-authorship of students and other forms of assistance to each other are not allowed. When performing independent work, the student is obliged to adhere to the rules of academic integrity and the direct prevention of plagiarism. The maximum number of points for independent work is 10.

The form of final control of students' knowledge of the discipline is an exam. The maximum number of points a student can get for the exam is 60 points. The exam is held in oral form based on exam tickets. The minimum evaluation of the results of the current control and independent work, for which the student is admitted to the exam, is 25 points.

Distribution of points between the forms of organization of the educational process and the types of control measures of the discipline "European private international law":

Current control					Final assessment of knowledge
Module № 1		Module № 2		Individual (independent) work	(exam) max 60
p/s	Test/Colloquium	p/s	Test/Colloquium		
max 10	max 5	max 10	max 5	max 10	max 100

Criteria for evaluating learning outcomes:

Type of assessment	Number of points	Criteria (for each point)
Current assessment during a seminar	Max 5	Excellent assimilation of educational material on the topic, some insignificant shortcomings are possible.
	4	Good assimilation of material on the topic, but there are separate помилки.
	3	Satisfactory level of assimilation of the material, a significant number of errors.
	2	Minimal results sufficient to obtain a positive assessment.
	1	Insufficient level of assimilation of the material, a significant number of significant errors.
	0	Unsatisfactory level of assimilation of the material.
Colloquium	Max 5	The results of the study of the material are high, a small number of insignificant errors are possible.
	4	Good assimilation of material on the topic, but there are separate помилки.
	3	Satisfactory level of assimilation of the material, a significant number of insignificant errors.
	2	Satisfactory level of assimilation of the material, a significant number of significant errors.
	1	Gaps in knowledge, the student has little knowledge of the material of work.
	0	Unsatisfactory level of assimilation of the material.
Individual work of students	Max 10	Deep knowledge of problems related to the topic of research, fluency in the material, the ability to think independently and creatively, find, generalize, analyze the material, make independent theoretical and practical conclusions.
	8	The main provisions of the topic are disclosed in the work, but there are some inaccuracies in the teaching of the material, theoretical concepts are not sufficiently supported by factual data.
	6	The main provisions of the topic are disclosed, but some issues are not fully covered. The student has a good command of the material, but there is no creativity and independence in the study.
	4	The main theoretical issues are covered superficially, there are no conclusions or conclusions are not independent; student has little mastery of the material.
	2	The main provisions of the topic are covered superficially, the theoretical provisions are not supported by the actual material; no conclusions; student has little knowledge of the material of work.
	0	The main provisions of the topic are covered superficially, with a large number of errors; no conclusions; the student does not possess the material of work.
