1. Introduction

1.1. *The purpose and tasks of the academic discipline.*

The purpose of the academic discipline is to form a system of scientific knowledge in the field of legal regulation of international relations of intellectual property at both the universal and regional levels, to develop the basic abilities and skills of applying the norms of international intellectual property law, to activate the analytical activity of students of higher education, to conduct research work in the sphere of legal regulation of international intellectual property relations and the international system of legal protection of intellectual property.

Tasks:

- acquisition by students of theoretical knowledge developed by the science of international intellectual property law in the field of international relations of intellectual property;
- development of regulatory material, which is the result of cooperation between states and other subjects in the field of legal protection of intellectual property;
- identification of current problems in the development of legal regulation of relations between subjects of international intellectual property law and directions of modern scientific research in this field;
- familiarization with the practice of international bodies that consider cases related to the provision of legal protection, protection of intellectual property rights, international regulation of intellectual property relations, as well as interpretation of provisions of EU Directives and Regulations;
- formation of skills and abilities to apply the norms of international intellectual property law in practical activities, taking into account the problems of the development of international relations in the field of legal protection of intellectual property and processes of harmonization of national laws.

1.2. *Status of the academic discipline in the structure of the educational and professional program:* compulsory.

1.3. *Prerequisites:* European private international Law, European Union Law and its system, WTO Law, International contract Law.

1.4. *Necessities:* Corporate law and EU governance, Law enforcement issues (professional and practical competences).

1.5. *Post-requisites:* -

1.6. *List of subject competencies of higher education applicant :*

SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.

SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.

SC-3. Knowledge of the prerequisites for the formation, periodization of development, concepts and approaches to the formation of institutions of international intellectual property law, their correlation with other institutions of international private law.

SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.

SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.

SC-6. Ability to describe general international legal characteristics of the leading international intergovernmental organizations that contribute to the protection of intellectual property worldwide and at the regional level.

SC-7. The ability to analyze, interpret, and correctly apply the studied categories of international intellectual property law.

SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.

SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.

SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.

SC-11. Knowledge and understanding of the basic provisions and principles of the emergence of legal protection of objects of copyright, patent law, commercial designations, as well as registration of intellectual property rights in relation to the specified objects.

SC-12. Knowledge and understanding of the specifics of the legal regulation of registration procedures regarding intellectual property objects, which are carried out through international bodies on the basis of international applications.

SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.

SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.

SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.

SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.

SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual property rights, develop and reproduce substantiated legal positions using game simulation.

SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.

SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.

SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.

SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.

SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.

SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.

The explanation of general and special competencies is defined in the map of subject competencies (Appendix 1)

List of learning outcomes of the applicant of higher education. They should be able to :

PLO AD 1.1. Demonstrate knowledge of key concepts, principles, theories and approaches to the regulation of international legal protection of intellectual property.

PLO AD 1.2. Analyze the main approaches to determining the nature and classification of intellectual property objects, distinguishing legal protection regimes for similar intellectual property objects; to substantiate their own ideas regarding the relevant issues.

PLO AD 1.3. Know and understand the specifics of regulatory approaches in international copyright and patent law, legal protection of commercial designations.

PLO AD 1.4. Carry out a logical, critical and systematic analysis of international agreements in the field of intellectual property, to determine their orientation and significance in the system of international legal protection of intellectual property, to understand the mechanism and consequences of the implementation of their norms in the national legal order.

PLO AD 1.5. Demonstrate knowledge of the main functions, tasks, directions of activity of WIPO in the field of intellectual property protection, to characterize the current state and prospects for the development of effective international cooperation in this field.

PLO AD 1.6. Search for, independently study and analyze domestic and foreign international legal literature in the context of researching current problems of the theory and practice of international intellectual property law.

PLO AD 1.7. Characterize the methods of conflict regulation of intellectual property relations, demonstrate knowledge of conflict norms in international treaties, as well as conflict ties in national systems; justify the choice of law to resolve conflict issues in intellectual property relations.

PLO AD 1.8. Characterize the regional system of legal protection of intellectual property in the EU countries, to professionally and critically assess the

influence of EU Directives on the harmonization of certain issues of intellectual property protection.

PLO AD 2.1. Demonstrate knowledge of basic international legal conventions in the field of copyright and related rights, understand the operation of the principle of national regime, critically assess the current state and needs of implementing their provisions into national legislation.

PLO AD 2.2. Analyze modern problems and challenges related to the global cross-border distribution of objects of copyright and related rights in the digital environment, the directions of international cooperation of states in the field of countering copyright and related rights violations, to propose their own vision of effective legal regulation.

PLO AD 2.3. Know the peculiarities of the emergence, implementation and protection of copyright and related rights, choose appropriate and effective ways of restoring violated rights, justify legal positions in order to resolve legal conflicts between participants in international intellectual property relations.

PLO AD 2.4. Carry out a critical analysis of the practice of national and international courts regarding the application of regulatory provisions in the field of copyright and related rights protection; interpret the provisions of international treaties, EU Directives and Regulations, make informed decisions based on the acquired theoretical knowledge and generalization of law enforcement practice.

PLO AD 2.5. Characterize the legal basis of activity, the functions of organizations of collective management of property copyright and related rights, as well as the mechanisms of their interaction in the field of mutual representation of the interests of foreign citizens.

PLO AD 2.6. Determine the mechanisms and consequences of the influence of international legal regulation of relations of collective management of copyright and related rights on the harmonization of national legislation in this area.

PLO AD 2.7. Provide professional advice on the implementation and protection of copyright and related rights in relations with a foreign entity.

PLO AD 2.8. Conduct research on current issues of international legal protection of copyright and related rights, analyze Ukrainian legislation for compliance with international and European standards of legal protection, formulate proposals for their implementation into national laws.

PLO AD - 3.1. Apply advanced knowledge and methods in the process of drawing up draft contracts on the disposal of intellectual property rights between subjects of electronic commerce.

PLO AD 3.1. Demonstrate knowledge of provisions unified by international treaties regarding the legal protection of inventions, utility models, industrial designs, and commercial designations; professionally assess the level of implementation of international standards in national legislation, understand the needs and ways of its harmonization at the current stage of development of industrial property relations.

PLO AD 3.2. To be aware of the peculiarities of the protection capability of various objects of industrial property, the extent of their legal protection; determine the procedure and conditions for the emergence of legal protection under national and international legal systems; establish and explain the factors affecting the prospects of acquiring legal protection.

PLO AD 3.3. Know and understand the registration procedures for international applications for the issuance of protective documents for inventions, utility models, industrial designs, trademarks; characterize international classifiers of industrial property objects, be able to use them.

LOR AD 3.4. Demonstrate knowledge of the main mechanisms and procedures for resolving disputes regarding obtaining protective documents for objects of industrial property, protecting the rights of rights holders from violations; justify the choice of effective methods of restoring violated rights, argue and present the legal position regarding the resolution of the legal conflict between the participants of intellectual property relations.

PLO AD 3.5. Research current problems of legal protection of industrial property objects, analyze the practice of international courts, interpret the

provisions of international treaties; formulate proposals for improving national legislation in accordance with international standards of legal protection.

PLO AD 3.6. Understand the current state of international legal cooperation in the field of industrial property protection, professionally evaluate the prospects for its development.

PLO AD 3.7. Characterize the regional system of protection of industrial property rights in the European Union, determine the mechanisms and directions of harmonization of EU legislation, demonstrate knowledge of Ukraine's obligations regarding the protection of geographical indications originating from the territory of the EU.

PLO AD 3.8. Identify the problems of legal regulation of intellectual property rights for objects of patent law, as well as means of individualization of goods and services; propose ways to overcome them in accordance with the principles of international intellectual property law, taking into account the practice of international courts, the experience of international organizations, and modern doctrine on the relevant issues.

An explanation of the results of mastering the educational discipline and the results of training by specialty and specialization is determined in the map of training results, formulated in terms of competencies (Appendix 2)

1.7. Programme modules of the academic discipline.

Module 1. International cooperation in the field of protection of intellectual property rights.

Module 2. Copyright and related rights in international private law.

Module 3. International industrial property law.

The programme of an academic discipline is a set of modules, their certain sequence, which contributes to the mastery of certain competencies necessary to achieve specific learning outcomes. Each module has a certain logical completeness in relation to the necessary results of mastering the educational and professional program as a whole. Topics are not defined within the module.

The modular principle of building the curriculum of an academic discipline ensures the flexibility of the content of an academic discipline, which is reflected in the possibility of its differentiation and integration. Continuity of a meaningful and logical transition between the modules of the academic

discipline program, as well as the increase of new knowledge become possible thanks to the application of the principle of the "didactic spiral".

The number of educational units (didactic volume) of the content of the academic discipline must correspond to the structure of the academic discipline and the actual study time of the students.

The didactic scope of the academic discipline is determined by the developer in an expert manner with a focus on the subject area of the academic discipline, as well as on competence and learning outcomes.

Quantitative and qualitative indicators of the implementation of the academic discipline program within the didactic structure are defined in the taxonomy of the academic discipline.

The explanation of the modules of the competence-oriented program of the academic discipline is defined in the matrix of connections between the modules of the academic discipline, learning outcomes and subject competencies (Appendix 3).

2. Description of the academic discipline (educational units)

Course	Level of education, field of knowledge, specialty, specialization	Didactic structure and number of hours
Number of ECTS credits: 4.0 Number of modules*: 3 Total number of hours: 120 Weekly hours: 4	Level of education - second (master's) Field of knowledge - 29 "International Relationships" Specialty - 293 "International Law"	Module 1 Lectures: 4 Practical lessons: 4 Independent work: 16 Module 2 Lectures: 6 Practical classes: 6 Independent work: 24 Module 3 Lectures: 8 Practical classes: 10 Independent work: 42 Types of control: Ongoing monitoring; final control of knowledge (assessment)

3. Contents of the curriculum

* recommended: no more than 2-3 modules for academic disciplines studied in one semester; no more than 4-6 modules for academic disciplines studied over two semesters.

Module 1. International cooperation in the field of protection of intellectual property rights.

The concept of intellectual property and general principles of its international legal protection. Concept, system of intellectual property objects and their classification. Peculiarities of legal regimes of intellectual property protection: copyright and related rights, patent law, protection of commercial designations. International legal regulation of intellectual property relations, its significance and impact on national legislation. Functions, tasks, areas of activity of WIPO in the process of international cooperation in the field of intellectual property protection. Regional systems of intellectual property protection. Conflict regulation of intellectual property relations: conflict rules in international treaties, conflict bindings in national systems: *lex loci protectionis*, *lex originis*, *lex voluntatis*, *lex contractus*, *lex loci delicti*.

International agreements in the field of protection of intellectual property rights. Classification of international legal agreements in the field of protection of intellectual property rights. Basic international conventions defining the main approaches, principles of protection and protection of intellectual property. The principle of the national regime. Agreements that establish the basis of legal protection of individual intellectual property objects. Agreements introducing classifications of intellectual property objects. EU directives aimed at harmonizing certain issues of intellectual property protection. International standards for the protection of intellectual property rights and countering their violations.

Module 2. Copyright and related rights in international private law.

International copyright. The minimum level of copyright protection established by the Berne Convention for the Protection of Literary and Artistic Works of 1886, Universal Copyright Convention (1952), Agreement on Trade-Related Aspects of Intellectual Property Rights of 1994 (TRIPS), WIPO Copyright Treaty (1996). Objects of copyright defined by the Convention norms. Objects not protected by copyright. Regulation of non-property and property copyrights in international conventions. Cases of free use of works. Minimum standards for

terms of copyright protection. Issues of copyright protection assigned to the competence of the national legislator.

Adjacent rights in international private law. The minimum level of protection of the rights of performers, producers of phonograms, broadcasting organizations established by the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations (Rome Convention, 1961). Improving the protection of the rights of producers of phonograms by the Convention for the Protection of Producers of Phonogram Against Unauthorized Duplication of Their Phonograms (Geneva Convention, 1971), as well as by the WIPO Performances and Phonograms Treaty (1996). Rights of broadcasting organizations under the Convention relating to the Distribution of Programme-Carrying Signals Transmitted by Satellite (1974). Harmonization of legal protection of related rights in the European Union.

Collective management of property rights of subjects of copyright and related rights. The concept of collective management of property rights. Collective management organizations (CMO), their functions. Cooperation of national CMO in the field of mutual representation of the interests of foreign rights holders. Contractual management of copyright and (or) related rights. Management based on the presumption of representation of the rights holders' interests. The impact of international legal regulation of collective management relations on the harmonization of national legislation in this area.

Module 3. International industrial property law.

International protection of rights to inventions and utility models. The results of creative activity that are subject to patenting. Concept of invention, useful model; unified approaches to providing legal protection. Paris Convention for the Protection of Industrial Property (1883). Novelty, inventive step, industrial suitability as conditions for legal protection of objects. The procedure for patenting inventions, utility models. Patent for an invention, patent for a utility model; independence of patents. Patent Cooperation Treaty (1970). Rights secured by a

patent, their validity period. Regional patent system of the European Community. European Patent Convention 1973, European Patent Office.

International protection of rights to industrial designs. Concept of industrial design, conditions of its legal protection: novelty, originality. International deposit of industrial designs in accordance with the Hague Agreement Concerning the International Registration of Industrial Designs. National procedures for providing legal protection to industrial designs. The right of priority. The national regime for the protection of the rights of foreign entities on the territory of the countries participating in the Paris Convention for the Protection of Industrial Property. Property rights to use an industrial design; cases of their limitation.

International protection of trademark rights. Concepts and types of trademarks. Terms of legal protection of a trademark. National registration of a trademark in the country of its origin as a basis for international registration. Scope of legal protection. Nice Agreement Concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks (1957). International application for trademark registration. Madrid Agreement Concerning the International Registration of Marks. International Bureau of WIPO. The right of priority. Scope and term of international registration. Protection of a well-known trademark. Enforcement of property rights to a trademark.

International protection of the name of the goods place of origin (geographical indication). The concept of the name of the goods place of origin, conditions for granting legal protection. The relationship of the special quality or other characteristics of the product with the geographical environment. The difference between the name of the place of origin and the specific name of the goods. Subjects of the right to use. International legal regulation of registration of the place of origin of goods, principles of its legitimate use. Madrid Agreement for the Repression of False or Deceptive Indications of Source of Goods (1891); Lisbon Agreement on Appellations of Origin and Geographical Indications (1958). Obligations of Ukraine regarding the protection of geographical indications originating from the territory of the EU.

4. Resource support of the academic discipline

4.1. Forms of organization of the educational process and types of educational classes

- forms of organization of the educational process: educational classes; individual work; practical training; control measures.
- types of educational classes: lectures, practical classes, individual classes, consultations.

4.2. Independent work of students of higher education

Independent work is a type of out-of-class work of an educational nature, which is aimed at studying the program material of the educational course. The content of independent work is determined by the program of the study discipline "International Intellectual Property Law", methodical materials, tasks and instructions of the teacher. During independent work, the applicant must process lecture notes, materials presented in textbooks, study guides on international intellectual property law, sources of international and national law of Ukraine and foreign countries, international and national judicial practice in accordance with the topics of the academic discipline. It is also important to work with scientific and practical comments, monographs, scientific articles, other scientific and educational literature recommended by the teacher. Methodical materials should provide for the possibility of self-monitoring by the student.

The student's independent work on learning the educational material can be carried out in the University's scientific library, classrooms, computer classes (laboratories), as well as at home.

In necessary cases, this work is carried out in accordance with a schedule prepared in advance, which guarantees the possibility of individual access of the student to the necessary didactic tools.

The forms of independent work of students are:

- written home assignment;

- assimilation of theoretical material on the topics of practical classes;
- revision of lecture materials;
- work in information networks;
- processing of additional literature;
- development of cases;
- essay on highly specialized issues;
- creation of a training course portfolio and its presentation;
- writing abstracts, reports and their presentation;
- preparation and publication of scientific articles, theses of scientific reports;
- participation in student scientific and practical conferences;
- compiling a bibliography on the relevant topic;
- generalization of court practice;
- commenting on sources of international law, as well as national law of Ukraine and foreign countries;
- other forms of work.

The student chooses the types of independent work according to his own interests and agreed with the teacher, who ensures organization, control and evaluation of the quality of the corresponding work.

Educational material, which, according to the working curriculum, must be mastered by students in the process of independent work, is included in the sum of the points of the current control together with the educational material that was processed during the training sessions.

4.3. *Educational technologies and teaching methods*

- educational technologies: problem-based learning, contextual learning, student-centered learning, audio-visual technologies, scientific discussions, interactive technologies, IT technologies, etc.;
- teaching methods: combination of verbal, visual and practical methods, method of problem-based teaching, press conferences, business games,

brainstorming, simulation of professional situations, case method, discussion method, round table, etc.

4.4. Forms of pedagogical control and quality assessment system of formed competences based on the results of mastering the academic discipline

Forms of students' knowledge control are current monitoring and final control.

Current monitoring of students' knowledge includes:

- quality control of the students' assimilation of the program material of the educational discipline in practical classes using the following means: oral, written or express survey, solving practical tasks or problems, participating in the development of a case, defending an essay on the initiative of the student. Current monitoring is aimed at checking the level of preparation of the student in studying the current material. In the course of the practical session, a student can receive an assessment on a five-point scale (0, 2, 3, 4, 6);

- quality control of the students' assimilation of the program material of the educational discipline, which is conducted at the end of the modules in the form of colloquiums.

During the semester, students perform tasks for independent work (preparation of a presentation, essay, report, etc.). The maximum number of points for independent work is 16 points.

The form of final control of the knowledge of higher education students in the academic discipline is the assessment. The minimum number of points to receive credit is 60.

Points distribution between forms of organization of the educational process
and types of control:

Ongoing monitoring							Final assessment of knowledge (credit)
Module No. 1		Module No. 2		Module No. 3		Independent work of students	
p/c	Test/control paper/colloquium	p/c	Test/control paper/colloquium	p/c	Test/control paper/colloquium		
max 12	max 8	max 18	max 8	max 30	max 8	max 16	max 100

Criteria for learning outcomes evaluating:

Type of control	Scores	Criteria (for each grade)
Ongoing monitoring at practical classes	Max 6	Excellent knowledge of educational material on the topic, some possible insignificant mistakes.
	4	Good mastering of the topic, but there are some mistakes.
	3	Satisfactory level of knowledge on the material, a significant number of mistakes.
	2	Minimum level of knowledge on the material, a significant number of mistakes.
	Min 0	Unsatisfactory level of knowledge on the material.
Testing/control work/colloquium	Max 8	The results of processing the material are high, a small number of insignificant mistakes are possible.
	4	Satisfactory level of knowledge on the material, a significant number of mistakes.
	Min 0	Unsatisfactory level of knowledge on the material.
Independent work	Max 16	Deep knowledge of the issues related to the research topic. Fluency in the material, the ability to think independently and creatively, find, generalize, analyze the material, draw independent theoretical and practical conclusions.
	8	The main issues are covered superficially, the conclusions do not reflect the main content of the work.
	Min 0	The main provisions of the topic are covered superficially, with a large number of mistakes, there are no conclusions, the student has a weak

		command of the material of the discipline.
Credit	Max 100	Excellent mastery of material from the discipline.
	Min 60	Sufficient level of knowledge on the material from the discipline.

4.5. *Educational, methodological and information support of the academic discipline*

Appendix 1

Map of subject competencies in the academic discipline

Code and name of competences by specialty and/or specialization	Code and name of competences from the academic discipline
GC - general (universal) competences	SC - subject competences in the academic discipline
GC 1. Ability to think critically, analyze and synthesize.	<p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-7. The ability to analyze, interpret, and correctly apply the studied categories of international intellectual property law.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.</p>
GC 2. The ability to identify and solve problems arising in the professional sphere, to formulate and ask questions for their further solution.	<p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual property rights, develop and reproduce substantiated legal positions using game simulation.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p>
GC 6. Ability to work effectively in an intercultural environment, including developing and managing international projects.	<p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-6. Ability to describe the general international legal characteristics of the leading international intergovernmental organizations</p>

	<p>that contribute to the protection of intellectual property worldwide and at the regional level.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>GC 7. Ability to conduct research at an appropriate level.</p>	<p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-7. The ability to analyze, interpret, and correctly apply the studied categories of international intellectual property law.</p> <p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p>
<p>GC 9. The ability to solve problems of an innovative nature and to find alternative solutions in professional activities.</p>	<p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.</p> <p>SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of</p>

	<p>international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p> <p>SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual property rights, develop and reproduce substantiated legal positions using game simulation.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p> <p>SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.</p>
<p>GC 10. The ability to work (collect, receive, systematize and synthesize) with various information and large volumes of information from various sources, analyze and critically and constructively evaluate it, taking into account the cross-cultural characteristics of the subjects of international relations.</p>	<p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.</p> <p>SC-11. Knowledge and understanding of the basic provisions and principles of the emergence of legal protection of objects of copyright, patent law, commercial designations, as well as registration of intellectual property rights in relation to the specified objects.</p> <p>SC-12. Knowledge and understanding of the specifics of the legal regulation of registration procedures regarding intellectual property objects, which are carried out through international bodies on the basis of international applications.</p> <p>SC-13. The ability to determine the conditions</p>

	<p>for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>GC 11. Ability to use the latest information and communication technologies for professional purposes.</p>	<p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>GC 12. The ability to formulate a personal opinion and present it with evidence.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-3. Knowledge of the prerequisites for the formation, periodization of development, concepts and approaches to the formation of institutions of international intellectual property law, their correlation with other institutions of international private law.</p>

	<p>SC-6. Ability to describe the general international legal characteristics of the leading international intergovernmental organizations that contribute to the protection of intellectual property worldwide and at the regional level.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p>
<p>GC 15. The ability to understand the specifics of the subject area and professional activity, to make well-founded, balanced decisions and to be aware of their ethical consequences.</p>	<p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.</p> <p>SC-12. Knowledge and understanding of the</p>

	<p>specifics of the legal regulation of registration procedures regarding intellectual property objects, which are carried out through international bodies on the basis of international applications.</p> <p>SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p>
<p>GC 16. The ability to communicate with representatives of other professional groups of different levels, from other fields of knowledge and activities, as well as the ability to work in an international professional environment.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p> <p>SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.</p>
<p>SC - special competences (choose competencies according to the content of the academic discipline)</p>	

<p>SC 1. The ability to critically analyze the problems and patterns of the functioning and development of international relations, to determine the trends in the development of world politics, to assess the impact of global political processes on national legal, political and economic systems.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.</p> <p>SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.</p> <p>SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.</p>
<p>SC 3. The ability to independently provide legal representation of the interests of individuals, legal entities or the state when considering cases in national and international institutions and organize the provision of legal services.</p>	<p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual</p>

	<p>property rights, develop and reproduce substantiated legal positions using game simulation.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p>
<p>SC 4. The ability to comprehensively use highly specialized knowledge in specific areas of regulation of international public law, international private law, and European law to solve applied problems.</p>	<p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-6. Ability to describe the general international legal characteristics of the leading international intergovernmental organizations that contribute to the protection of intellectual property worldwide and at the regional level.</p> <p>SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.</p> <p>SC-11. Knowledge and understanding of the basic provisions and principles of the emergence of legal protection of objects of copyright, patent law, commercial designations, as well as registration of intellectual property rights in relation to the specified objects.</p> <p>SC-12. Knowledge and understanding of the specifics of the legal regulation of registration procedures regarding intellectual property objects, which are carried out through international bodies on the basis of international applications.</p> <p>SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual</p>

	<p>property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p> <p>SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual property rights, develop and reproduce substantiated legal positions using game simulation.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>SC 7. Ability to represent the interests of Ukraine or individuals and legal entities in international judicial institutions, arbitrations, national courts of foreign countries.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-17. Knowledge of the main mechanisms and procedures for resolving disputes between participants in intellectual property relations with a foreign element, the ability to choose effective ways to restore violated intellectual property rights, develop and reproduce substantiated legal positions using game simulation.</p>

	<p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-20. The ability to provide qualified consultations and legal opinions regarding certain issues of the theory and practice of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p>
<p>SC 8. Ability to work and represent the interests of Ukraine in international intergovernmental organizations.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-6. Ability to describe the general international legal characteristics of the leading international intergovernmental organizations that contribute to the protection of intellectual property worldwide and at the regional level.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>SC 11. The ability to ensure the implementation of international legal standards in certain areas of national legislation.</p>	<p>SC-10. The ability to explain the peculiarities of international legal regulation of relations in the sphere of the use of objects of copyright and objects of industrial property.</p> <p>SC-11. Knowledge and understanding of the basic provisions and principles of the emergence of legal protection of objects of copyright, patent law, commercial designations, as well as registration of intellectual property rights in relation to the specified objects.</p> <p>SC-12. Knowledge and understanding of the specifics of the legal regulation of registration procedures regarding intellectual property objects, which are carried out through international bodies on the basis of international applications.</p>

	<p>SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p> <p>SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p>
<p>SC 12. Ability to conduct research and/or introduce innovations in various fields and institutions of public international law, private international law, EU law.</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner regarding current problems of international intellectual property law.</p> <p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-3. Knowledge of the prerequisites for the formation, periodization of development, concepts and approaches to the formation of institutions of international intellectual property law, their correlation with other institutions of international private law.</p> <p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-5. The ability to determine the legal status of various participants in international relations, the scope of their international legal</p>

	<p>personality in the relevant field and the possibility of influencing the international policy of intellectual property protection.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.</p> <p>SC-16. The ability to identify the shortcomings of modern approaches to the legal regulation of intellectual property relations, to identify areas that require harmonization of national laws, and to propose ways to improve them.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p> <p>SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>SC 14. The ability to apply an interdisciplinary approach in the assessment of international legal phenomena and international relations using legal tools.</p>	<p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with</p>

	<p>the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-3. Knowledge of the prerequisites for the formation, periodization of development, concepts and approaches to the formation of institutions of international intellectual property law, their correlation with other institutions of international private law.</p> <p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-13. The ability to determine the conditions for protection of various intellectual property objects, to explain their content, to determine the factors affecting the prospects of acquiring legal protection.</p> <p>SC-22. The ability to identify and evaluate modern challenges in the field of functioning of the international system of legal protection of intellectual property, knowledge of the main international acts and organizational tools that contribute to increasing its effectiveness.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>SC 15. The ability to make decisions in situations that require a systematic, logical and functional interpretation of the norms of international law (public/private), the law of the European Union, as well as an understanding of the peculiarities of the practice of their application.</p>	<p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p>
<p>SC 16. Ability to work with international documentation (treaties, acts of international organizations and bodies, etc.), determine their legal nature, draft projects and accompanying documentation in Ukrainian and foreign languages.</p>	<p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and</p>

	<p>current state of development of the main legal categories of international intellectual property law.</p> <p>SC-4. Ability to analyze legal phenomena, legal facts, legal norms and legal relations related to the subject of international intellectual property law.</p> <p>SC-15. The ability to assess the degree of effectiveness of legal regulation of certain spheres of intellectual property rights implementation and to determine the prospects for the development of the corresponding legal regulation.</p> <p>SC-18. The ability to use information technologies and databases in the process of collecting and processing information within a specific topic in the field of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p> <p>SC-23. Ability to work with international acts in various spheres of international intellectual property relations, including international classifiers of intellectual property objects.</p>
<p>SC 20. The ability to provide a proper legal assessment of evidence in a legal case and in a specific procedural situation, the ability to work with evidence, to solve problems related to the planning and organization of the legal process, the resolution of a legal case within different jurisdictions.</p>	<p>SC-7. The ability to analyze, interpret, and correctly apply the studied categories of international intellectual property law.</p> <p>SC-8. The ability to correctly interpret and apply the norms of international intellectual property law in professional activities and to explain the specifics of the application of various sources of international intellectual property law.</p> <p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-14. Knowledge and understanding of the methods of conflict regulation of intellectual property relations, conflict of law norms of international treaties, as well as conflict of law bindings in national laws, which resolve conflict issues regarding the origin, scope, content of intellectual property rights, their transfer and protection against violations.</p>
<p>SC 21. The ability to communicate effectively in an international, multicultural</p>	<p>SC-1. The ability to formulate and express one's own position in an argumentative manner</p>

<p>environment using knowledge in the fields of international law, European law and international relations.</p>	<p>regarding current problems of international intellectual property law.</p> <p>SC-2. Knowledge of general theoretical terms and concepts of international intellectual property law, principles of international intellectual property law, their correlation with the principles of other branches of international law, as well as the content, specifics, and current state of development of the main legal categories of international intellectual property law.</p> <p>SC-6. Ability to describe the general international legal characteristics of the leading international intergovernmental organizations that contribute to the protection of intellectual property worldwide and at the regional level.</p> <p>SC-9. Ability to independently identify and investigate legal issues arising in the context of legal regulation of international relations of intellectual property in various areas.</p> <p>SC-19. Ability to conduct analytical research on the theory and practice of international intellectual property law.</p> <p>SC-21. Ability to analyze documents of international organizations, international conferences, international courts and characterize their influence on the regulation of various spheres of international intellectual property relations.</p>

Appendix 2

Map of the results of studies of a higher education student, formulated in terms of competencies

Code and name of RN by specialty	ND module	The code and name of the RN from the academic discipline
Program Training Outcomes (PTO)		Learning outcomes from the academic discipline
PTO 1. To analyze multifaceted problems of international and national legal content and propose ways to solve them.	№ 1	PLO AD 1.1. Demonstrate knowledge of key concepts, principles, theories and approaches to the regulation of international legal protection of intellectual property.

	№ 2	<p>PLO AD 1.2. Analyze the main approaches to determining the nature and classification of intellectual property objects, distinguishing legal protection regimes for similar intellectual property objects; to substantiate their own ideas regarding the relevant issues.</p> <p>PLO AD 2.1. Demonstrate knowledge of basic international legal conventions in the field of copyright and related rights, understand the operation of the principle of national regime, critically assess the current state and needs of implementing their provisions into national legislation.</p> <p>PLO AD 2.2. To analyze modern problems and challenges related to the global cross-border distribution of objects of copyright and related rights in the digital environment, the directions of international cooperation of states in the field of countering copyright and related rights violations, to propose their own vision of effective legal regulation.</p>
	№ 3	<p>PLO AD 3.4. Demonstrate knowledge of the main mechanisms and procedures for resolving disputes regarding obtaining protective documents for objects of industrial property, protecting the rights of rights holders from violations; justify the choice of effective methods of restoring violated rights, argue and present the legal position regarding the resolution of the legal conflict between the participants of intellectual property relations.</p> <p>PLO AD 3.5. Research current problems of legal protection of industrial property objects, analyze the practice of international courts, interpret the provisions of international treaties; formulate proposals for improving national legislation in accordance with international standards of legal protection.</p> <p>PLO AD 3.8. To identify the problems of legal regulation of intellectual property rights for objects of patent law, as well as means of</p>

	№ 3	<p>generalization of law enforcement practice.</p> <p>PLO AD 2.7. Provide professional advice on the implementation and protection of copyright and related rights in relations with a foreign entity.</p> <p>PLO AD 3.2. To be aware of the peculiarities of the protection capability of various objects of industrial property, the extent of their legal protection; determine the procedure and conditions for the emergence of legal protection under national and international legal systems; establish and explain the factors affecting the prospects of acquiring legal protection.</p> <p>PLO AD 3.3. Know and understand the registration procedures for international applications for the issuance of protective documents for inventions, utility models, industrial designs, trademarks; characterize international classifiers of industrial property objects, be able to use them.</p>
<p>PTO 7. To make informed decisions based on the acquired knowledge of international public, private and EU law and to be aware of their consequences for various subjects of national and international law.</p>	<p>№ 1</p> <p>№ 2</p>	<p>PLO AD 1.3. Know and understand the specifics of regulatory approaches in international copyright and patent law, legal protection of commercial designations.</p> <p>PLO AD 1.7. Characterize the methods of conflict regulation of intellectual property relations, demonstrate knowledge of conflict norms in international treaties, as well as conflict ties in national systems; justify the choice of law to resolve conflict issues in intellectual property relations.</p> <p>PLO AD 2.3. Know the peculiarities of the emergence, implementation and protection of copyright and related rights, choose appropriate and effective ways of restoring violated rights, justify legal positions in order to resolve legal conflicts between participants in international intellectual property relations.</p> <p>PLO AD 2.4. Carry out a critical analysis of the practice of national and international courts regarding the application of regulatory provisions in the field of copyright and related rights protection; to interpret the provisions of</p>

	№ 3	<p>international treaties, EU Directives and Regulations, to make informed decisions based on the acquired theoretical knowledge and generalization of law enforcement practice.</p> <p>PLO AD 2.6. To determine the mechanisms and consequences of the influence of international legal regulation of relations of collective management of copyright and related rights on the harmonization of national legislation in this area.</p> <p>PLO AD 3.5. Research current problems of legal protection of industrial property objects, analyze the practice of international courts, interpret the provisions of international treaties; formulate proposals for improving national legislation in accordance with international standards of legal protection.</p> <p>PLO AD 3.6. Understand the current state of international legal cooperation in the field of industrial property protection, professionally evaluate the prospects for its development.</p> <p>PLO AD 3.7. To characterize the regional system of protection of industrial property rights in the European Union, to determine the mechanisms and directions of harmonization of EU legislation, to demonstrate knowledge of Ukraine's obligations regarding the protection of geographical indications originating from the territory of the EU.</p>
<p>PTO 11. To demonstrate communication skills with representatives of other professional groups of different levels, other fields of knowledge and types of activities, as well as the ability to work in an international, intercultural environment; to organize and conduct negotiations.</p>	<p>№ 1</p> <p>№ 2</p>	<p>PLO AD 1.1. Demonstrate knowledge of key concepts, principles, theories and approaches to the regulation of international legal protection of intellectual property.</p> <p>PLO AD 1.5. To demonstrate knowledge of the main functions, tasks, directions of activity of WIPO in the field of intellectual property protection, to characterize the current state and prospects for the development of effective international cooperation in this field.</p> <p>PLO AD 2.3. Know the peculiarities of the emergence, implementation and</p>

	№ 3	<p>protection of copyright and related rights, choose appropriate and effective ways of restoring violated rights, justify legal positions in order to resolve legal conflicts between participants in international intellectual property relations.</p> <p>PLO AD 2.7. Provide professional advice on the implementation and protection of copyright and related rights in relations with a foreign entity.</p> <p>PLO AD 3.3. Know and understand the registration procedures for international applications for the issuance of protective documents for inventions, utility models, industrial designs, trademarks; characterize international classifiers of industrial property objects, be able to use them.</p> <p>PLO AD 3.4. Demonstrate knowledge of the main mechanisms and procedures for resolving disputes regarding obtaining protective documents for objects of industrial property, protecting the rights of rights holders from violations; justify the choice of effective methods of restoring violated rights, argue and present the legal position regarding the resolution of the legal conflict between the participants of intellectual property relations.</p>
<p>PTO 15. To characterize different legal systems and mechanisms of their interaction; to know the features of the international regulatory system and the place of International Law (public/private) and European Union Law in it.</p>	№ 1	<p>PLO AD 1.3. Know and understand the specifics of regulatory approaches in international copyright and patent law, legal protection of commercial designations.</p> <p>PLO AD 1.4. To carry out a logical, critical and systematic analysis of international agreements in the field of intellectual property, to determine their orientation and significance in the system of international legal protection of intellectual property, to understand the mechanism and consequences of the implementation of their norms in the national legal order.</p> <p>PLO AD 1.8. To characterize the regional system of legal protection of intellectual property in the EU countries, to professionally and critically assess the influence of EU</p>

	<p>№ 2</p> <p>№ 3</p>	<p>Directives on the harmonization of certain issues of intellectual property protection.</p> <p>PLO AD 2.4. Carry out a critical analysis of the practice of national and international courts regarding the application of regulatory provisions in the field of copyright and related rights protection; to interpret the provisions of international treaties, EU Directives and Regulations, to make informed decisions based on the acquired theoretical knowledge and generalization of law enforcement practice.</p> <p>PLO AD 2.5. To characterize the legal basis of activity, the functions of organizations of collective management of property copyright and related rights, as well as the mechanisms of their interaction in the field of mutual representation of the interests of foreign citizens.</p> <p>PLO AD 3.6. Understand the current state of international legal cooperation in the field of industrial property protection, professionally evaluate the prospects for its development.</p> <p>PLO AD 3.7. To characterize the regional system of protection of industrial property rights in the European Union, to determine the mechanisms and directions of harmonization of EU legislation, to demonstrate knowledge of Ukraine's obligations regarding the protection of geographical indications originating from the territory of the EU.</p>
<p>PTO 17. To carry out research on international legal topics, using primary sources and methods of legal interpretation of complex problems arising from this research, justify the conclusions and present the results of the research.</p>	<p>№ 1</p>	<p>PLO AD 1.2. Analyze the main approaches to determining the nature and classification of intellectual property objects, distinguishing legal protection regimes for similar intellectual property objects; to substantiate their own ideas regarding the relevant issues.</p> <p>PLO AD 1.4. To carry out a logical, critical and systematic analysis of international agreements in the field of intellectual property, to determine their orientation and significance in the system of international legal protection</p>

	<p>№ 2</p> <p>№ 3</p>	<p>of intellectual property, to understand the mechanism and consequences of the implementation of their norms in the national legal order.</p> <p>PLO AD 1.6. Search for, independently study and analyze domestic and foreign international legal literature in the context of researching current problems of the theory and practice of international intellectual property law.</p> <p>PLO AD 2.8. Conduct research on current issues of international legal protection of copyright and related rights, analyze Ukrainian legislation for compliance with international and European standards of legal protection, formulate proposals for their implementation into national laws.</p> <p>PLO AD 3.5. Research current problems of legal protection of industrial property objects, analyze the practice of international courts, interpret the provisions of international treaties; formulate proposals for improving national legislation in accordance with international standards of legal protection.</p> <p>PLO AD 3.8. To identify the problems of legal regulation of intellectual property rights for objects of patent law, as well as means of individualization of goods and services; propose ways to overcome them in accordance with the principles of international intellectual property law, taking into account the practice of international courts, the experience of international organizations, and modern doctrine on the relevant issues.</p>
<p>PTO 19. To demonstrate knowledge of the evolution, current state and prospects for the development of legal regulation of various spheres of international cooperation, to be aware of the consequences of the convergence of legal systems in the conditions of globalization and regional integration.</p>	<p>№ 1</p>	<p>PLO AD 1.5. To demonstrate knowledge of the main functions, tasks, directions of activity of WIPO in the field of intellectual property protection, to characterize the current state and prospects for the development of effective international cooperation in this field.</p> <p>PLO AD 1.8. To characterize the regional system of legal protection of intellectual property in the EU countries, to professionally and critically assess the influence of EU</p>
