4. Resource support of the academic discipline

4.1. Forms of organization of the educational process and types of educational classes:

- forms of organization of the educational process: educational classes; independent work; practical training; control measures;

- types of educational classes: lectures, practical classes, individual classes, consultations.

4.2. Independent work of students of higher education

Independent work is a type of out-of-class work of an educational nature, which is aimed at studying the program material of the educational course. The content of independent work is determined by the program of the academic discipline "Competition (antimonopoly) law of the European Union", methodical materials, tasks and instructions of the teacher. During independent work, the applicant must process lecture notes, materials presented in textbooks, study guides, sources of international and national law of Ukraine and foreign countries, international and national judicial practice in accordance with the topics of the academic discipline. It is also important to work with scientific and practical comments, monographs, scientific articles, other scientific and educational literature

recommended by the teacher. Methodical materials should provide for the possibility of self-monitoring by the student.

The student's independent work on learning the educational material can be carried out in the University's scientific library, classrooms, computer classes (laboratories), as well as at home.

In necessary cases, this work is carried out in accordance with a schedule prepared in advance, which guarantees the possibility of individual access of the student to the necessary didactic tools.

The forms of independent work of students are:

- written homework;
- assimilation of theoretical material on the topics of practical classes;
- revision of lecture materials;
- development of new scientific and educational literature;
- work in information networks;
- development of additional literature;
- development of cases;
- essay on highly specialized issues;
- creation of a training course portfolio and its presentation;
- writing abstracts, reports and their presentation;
- preparation and publication of scientific articles, theses of scientific reports;
- participation in student scientific and practical conferences;
- compiling a bibliography on the relevant topic;
- generalization of court practice;
- other forms of work.

The student chooses the types of independent work according to his own interests and is agreed with the teacher, who ensures organization, control and evaluation of the quality of the corresponding work.

Educational material, which, according to the working curriculum, must be mastered by students in the process of independent work, is included in the sum of

the points of the current control together with the educational material that was processed during the training sessions.

4.3. Educational technologies and teaching methods

– educational technologies: problem-based learning, contextual learning, student-centered learning, audio-visual technologies, scientific discussions, interactive technologies, IT technologies, etc.;

4.4. Forms of pedagogical control and the system of evaluating the quality of formed competences based on the results of mastering an educational discipline

- quality control of the students' assimilation of the program material of the educational discipline in practical classes using the following means: oral, written or express survey, solving practical tasks or tasks, performing test tasks, participating in the development of a case, defense of a judicial portfolio, defense of an essay or abstract for initiatives student Current control is aimed at checking the level of preparation of the applicant in studying the current material. In the course of the practical session, the applicant can receive an assessment on a five-point scale (1, 2, 3, 4, 5);

- quality control of the students' assimilation of the program material of the educational discipline, which is carried out at the end of the modules in the form of colloquiums, tests, testing, etc.

During the semester, students perform tasks for independent work (processing of statistical data of EU institutions, decisions of the Court of the European Union; preparation of abstracts of reports for scientific and practical conferences and articles; conducting a research (project) on a narrow issue with its subsequent presentation, etc.). The work is individual and independent, and therefore co-authorship of students and other forms of assistance to each other are not allowed. When performing independent work, the student is obliged to adhere to the rules of

academic integrity and the direct prevention of plagiarism. The maximum number of points for independent work is 20.

The form of final control of the knowledge of higher education students in the academic discipline is the assessment. The minimum number of points to receive credit is 60.

Distribution of points among the forms of the educational process organization and types of control measures:

Current control					Final assessment of knowledge (test)
Module № 1		Module № 2		Individual work	
p/s	Test / colloquium	p/s	Test / colloquium		
Max 25	Max 15	Max 25	Max 15	Max 20	Max 100

Criteria for evaluating learning outcomes:

Types of assessment	Points	Criteria (for each point)
Assessment during seminars	Max 5	Excellent assimilation of educational material on the topic, some insignificant shortcomings are possible.
	4	Good assimilation of material on the topic, but there are some mistakes.
	3	Satisfactory level of assimilation of the material, a significant number of errors.
	2	Minimal results sufficient to obtain a positive assessment.
	1	Insufficient level of assimilation of the material, a significant number of significant errors.
	Min 0	Unsatisfactory level of assimilation of the material.
Tests / colloquium	Max 15	Deep knowledge of problems related to the topic, fluency in the material, the ability to think independently and creatively, find, generalize, analyze the material, make independent theoretical and practical conclusions.
	12	The main provisions of the topic are disclosed, but there are some inaccuracies in the teaching of the material, theoretical concepts are not sufficiently supported by factual data.
	10	The main provisions of the topic are disclosed, but some issues are not fully covered. The student has a good command of the material, but there is no creativity and independence in the study.
	8	Satisfactory results of the study of the material, a certain number of insignificant errors are possible.
	6	Satisfactory level of assimilation of the material, a significant number of errors.
Assessment of individual work	Max 20	The work is designed in accordance with the requirements of the department. The work does not contain methodological errors, there are references to sources and own conclusions. When protecting, deep knowledge of the topic is demonstrated, as well as the provability of conclusions, positions, classifications, etc.
	15	The work is designed in accordance with the requirements of the department. The work contains minor methodological errors, there are references to sources, there are own conclusions. When protecting, sufficient knowledge of the topic is demonstrated, as well as the provability of conclusions, positions, classifications, etc.
	10	The work is designed in accordance with the requirements of the department, but with minor errors. The work contains methodological and substantive errors, there are references to sources, there are own conclusions. During the defense, sufficient knowledge of the topic was demonstrated, but problems arose with the argumentation of

		individual concepts and judgments in the work, and the provability of conclusions.
	8	The work is framed with errors and violations of the cathedral requirements for the form of work. The work contains methodological and substantive errors, insufficient sources were used to justify the research and conclusions. When defending, difficulties arose in revealing the content of the topic, making arguments regarding individual provisions of the work and the validity and provability of conclusions.
	Min 0	The work is framed improperly, without reference to sources and contains methodological errors. In defense, the author of the work cannot demonstrate knowledge on the chosen topic, argue concepts and analyze information. The work was done in violation of the requirements of academic integrity.
